Education

Bachelor of Science in Computer Science

Jul 2023 - Jun 2026

The University of Melbourne

Major: Computing and Information Systems

Current WAM: 85.73%

Certificates

Google Data Analytics Professional Certificate - Gaborone, Botswana

December 2022 - May 2023

- Gained proficiency in data analysis techniques, including cleaning, visualizing, and interpreting data using tools such as Spreadsheets, Tableau, and R, enabling effective decision-making

Other Experience

Software Developer (Project Based)

Dec, 2021 - Jan, 2022

Simsa Solar, Gaborone, Botswana

- Developed a Visual Basic tool to automate hydraulic pump selection, improving efficiency for agricultural irrigation
- Integrated key calculations (flow rate, pressure, friction factor, energy efficiency) to optimize pump selection for various agricultural use cases
- Built and tested an algorithm to evaluate pump models based on solar power availability and cost-effectiveness

Volunteer and Extra-curricular Activity

University of Melbourne Information Security Club, Events Director

- Currently leading a team of 7 members to plan and execute events, including academic workshops, Capture The Flag competitions, and social nights, increasing club engagement
- Managed logistical operations, including venue booking, catering arrangements, and promotional strategies, resulting in execution of 5+ events with an average attendance of 20 participants
- Partnered with sponsors, including McGrathNicol, to organize Capture The Flag events and workshops, and engaging 20-30 participants per event

University of Melbourne Information Security Club, Education Officer

- Organized and delivered academic workshops on cybersecurity, educating students on topics such as penetration testing, network analysis, and SQL injection

- Facilitated interactive sessions for 15+ university students per session, covering fundamental cybersecurity principles and practical applications
- Cooperated with a team to organize social nights, including trivia and game nights, increasing club engagement and reputation

Skills

Programming Languages: Python | SQL | Javascript | R | Java | C | HTML | CSS

Technical: Microsoft Office Suite, MATLAB, Power BI, Tableau, MySQL

Libraries: pandas, matplotlib, ggplot2, beautifulsoup2, re

Tools: DAX, API, Power Query, Pivot Table, Pivot Chart, VLOOKUP, VBA

Packages: dplyr, ggplot, tm, tidyr

Frameworks: React, NodeJS, Flutter, NextJS

Projects

Data Analysis Project

Sep, 2024 - Oct, 2024

University Project, Melbourne, Australia

- Engaged with 3 group members to analyse relationship between electronic gambling machine losses and crime rates
- Utilised python pandas to clean, shape and merge different data tables
- Incorporated methods such as K-means clustering, K-Fold cross-validation, NMI and regression
- Predicted future crime rates by utilising regression techniques and presented findings to a panel of 2 academics, demonstrating analytical thinking, structured problem-solving, and data visualization skills

Taxi Game Development

Sep, 2024 - Oct, 2024

University Project, Melbourne, Australia

- Applied Object Oriented programming concepts to create a simple taxi game in Java
- Designed and implemented a class hierarchy by adopting Inheritance, Interfaces, and Abstract Classes, reducing code redundancy and enhancing maintainability
- Incorporated design patterns such as Singleton and Factory, ensuring modularity and scalability for future feature enhancements

Web and Mobile Application Development

Aug, 2024 - Aug, 2024

Hackathon Project, Melbourne, Australia

- Collaborated with a team of 4 to construct an event ticketing and management application during a hackathon using Flutter
- Utilized FlutterFlow to build a responsive and dynamic frontend optimized for web and mobile platforms
- Designed an intuitive user interface in Figma, ensuring a seamless and user-friendly experience
- Integrated Supabase as backend to perform secure authentication, real-time database operations, and scalable cloud storage
